

Model 4200

Description

Ironman 4200 personal Safe.

Solid 10 gauge steel. Superior fire composites and adds to the overall safe volume
External hinge with full, 180° door swing for a unique door removal system.

Solid 3/4" continuous hinge side-locking bar, inhibiting pry bar attacks on the hinge side.

Heat sensitive expanding fire gasket to seal door edges and protect from fire and water damage.

(5)-1 inch solid horizontal locking pins to allow for better defense against assaults. – Stainless steel available.

Polished satin dial and dial ring, with matching door handles for a high quality look as well as corrosion protection.

Powder-coat finish process that is superior to the paint finishes on most gun safes.

Felted interior, gun rack and adjustable shelves included. Felt is eco-friendly by recycling plastic bottles. A drill resistant plate and lock back plates are used to prevent the lock from being punched or drilled, both of which are common methods of attempted to force entry.
